

Mukesh

UI Developer

About Me

Let me introduce myself, I am a UI Developer with 3 years of experience. I'm passionate about creating intuitive and visually appealing user interfaces that enhance the overall user experience.

Work Experience & Projects

Techdew | Chennai

2022--Present

Angular Developer - Test Automation (Onsite project)

The project aims to increase test coverage by automating manual test cases, ensuring thorough and consistent testing across all application features. The goal of this project is to implement a comprehensive test automation framework to improve the quality and efficiency of the software development process.

UI Developer - Revalgo Shipping

Monitoring the onboard crew members in a ship and vessel details. This included designing intuitive dashboards to monitor onboard crew members and ensuring effective data visualization also with real time information.

Web Developer (Prototypes)

I've designed multiple POCs, employing frontend development to prototype various applications. This process involves showcasing the behavior of the application while illustrating its conceptual aspects to the clients for their insight.

Freelancing | Kaliakkavilai, Kanniyakumari.

2020 - 2021

UI Developer

Design and developing a shopping website for a tea manufacturing company. This platform will provide a secure and user-friendly experience for customers while enabling efficient updates and additions by authorized administrators. This platform also has an admin panel for seamless product Management.
